The information Disclosure Statement filed 10/04/2004, Declarations filed 07/20/2004 and RCE filed 05/26/2004 have been entered and considered. The Declarations show distinctions between the prior art of record and applicants' claimed invention.

Following are new grounds of rejection.

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 45-51, 62, 63 and 70-72 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants describe their coating as "air-tight". There does not appear to be evidence to support such a limitation. At most applicants describe forming a continuous low oxygen or gas permeable coating or a coating that allows, low oxygen or other gas and moisture permeation. Page 1, lines 5-7, page 4, lines 16-19, page 13, line 23 through page 14, line 1.

Claims 1-44, 52-61 and 64-69 have been canceled.
